---

Hello,

I have no connection to this project other than living within the 500 foot project notification radius. I do not know any of the project applicants or employees, nor do I have a direct financial stake in this project.

I'm writing in strong support of the project. I support this project because I believe it will help improve Santa Ana economically. Currently, the address sits as a vacant lot, lowering property values and quality of life for the neighborhood. Building this housing will increase the supply of housing, which tends to lower housing costs for individuals. It also will improve property values by making the area more desirable.

I strongly encourage the approval of this project, and for the city to encourage more development projects in more of the empty lots around the city.

Best,  
Gerard Gully
